AN ADD-ON FOR INKLEDGER

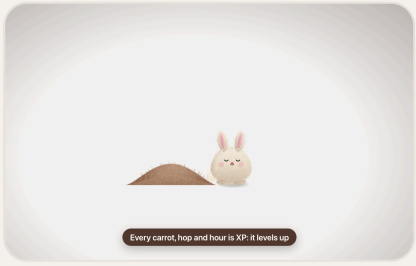

Kanbunny

A desk bunny that lives on the corner of your work. It eats a carrot for every ticket you close, hops when your cards move, levels up, collects trophies and outfits, and grows with the hours you log.

A closed ticket is a carrot

Every carrot and hour is XP

A wardrobe that grows with you

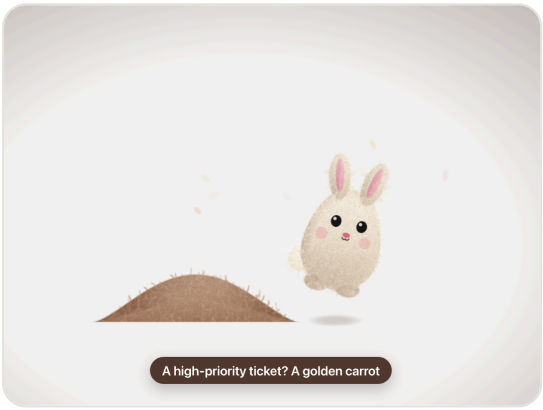

MEET KANBUNNY

Never in the way, always there

It lives in a small burrow on the bottom corner of the main panel: it takes no room and moves nothing. It comes out when something happens, then goes back in.

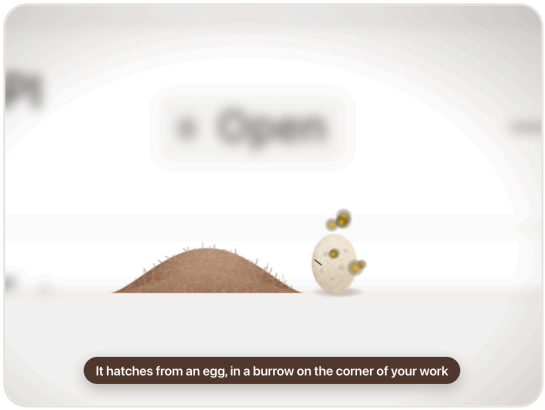

Closes with you

Close a ticket and it nibbles a carrot. A high-priority ticket is a golden carrot, with sparkles.

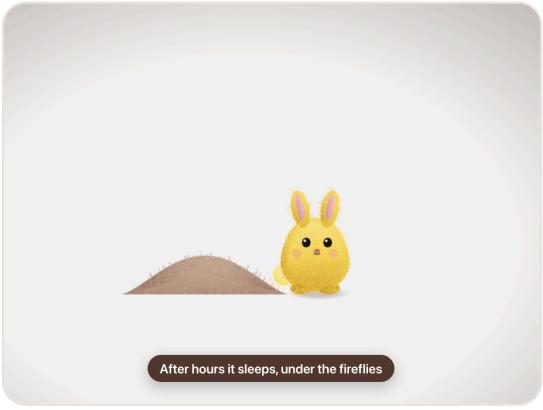

Moves with your board

Move a card between columns and it hops. Start a timer and it jumps. Reach your daily goal and it celebrates.

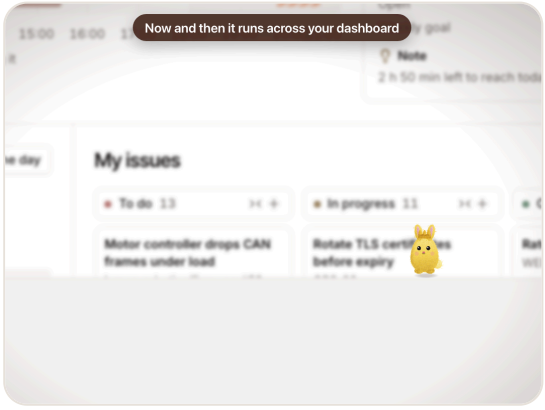

Out of your way

Work near its corner and it fades. Clicks always reach your page. In Focus mode it stays in its burrow.

Runs across your dashboard

Now and then, and when you hit your goal, it runs along the bottom of the dashboard, stops for a sniff, and leaves.

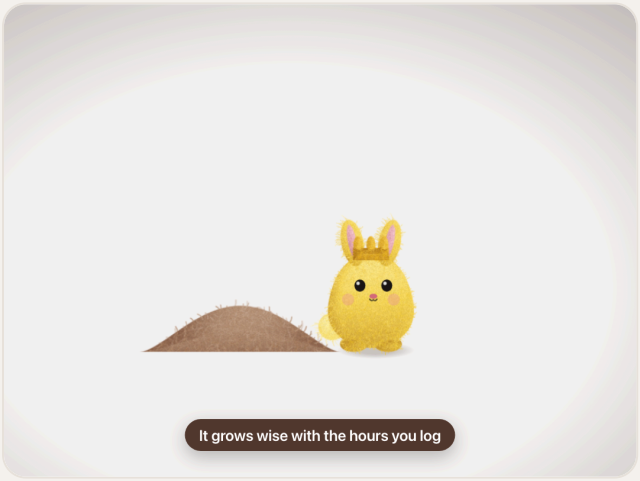

A LIFE OF ITS OWN

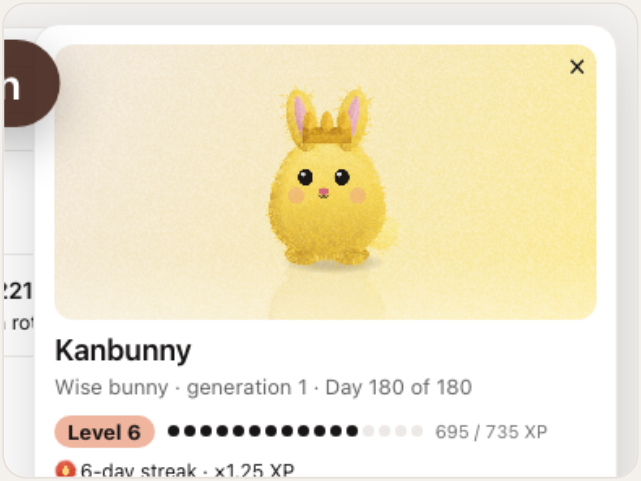

From egg to wise bunny

It hatches from an egg and grows with the hours you log together. It gets hungry when tickets stay open, sleeps after hours, and has a planned, finite life: after a full life it watches its sunset, and a new egg carries the family on, keeping the album, the trophies and one piece of the wardrobe.

A wise bunny, after many hours together

The sunset, and the egg that inherits

THE GAME

Levels, streaks, trophies, outfits

XP from carrots, hops, hours, goals

Streak multiplier up to ×2

One day off a week forgiven

18 trophies

11 outfits

Trophies

Wardrobe

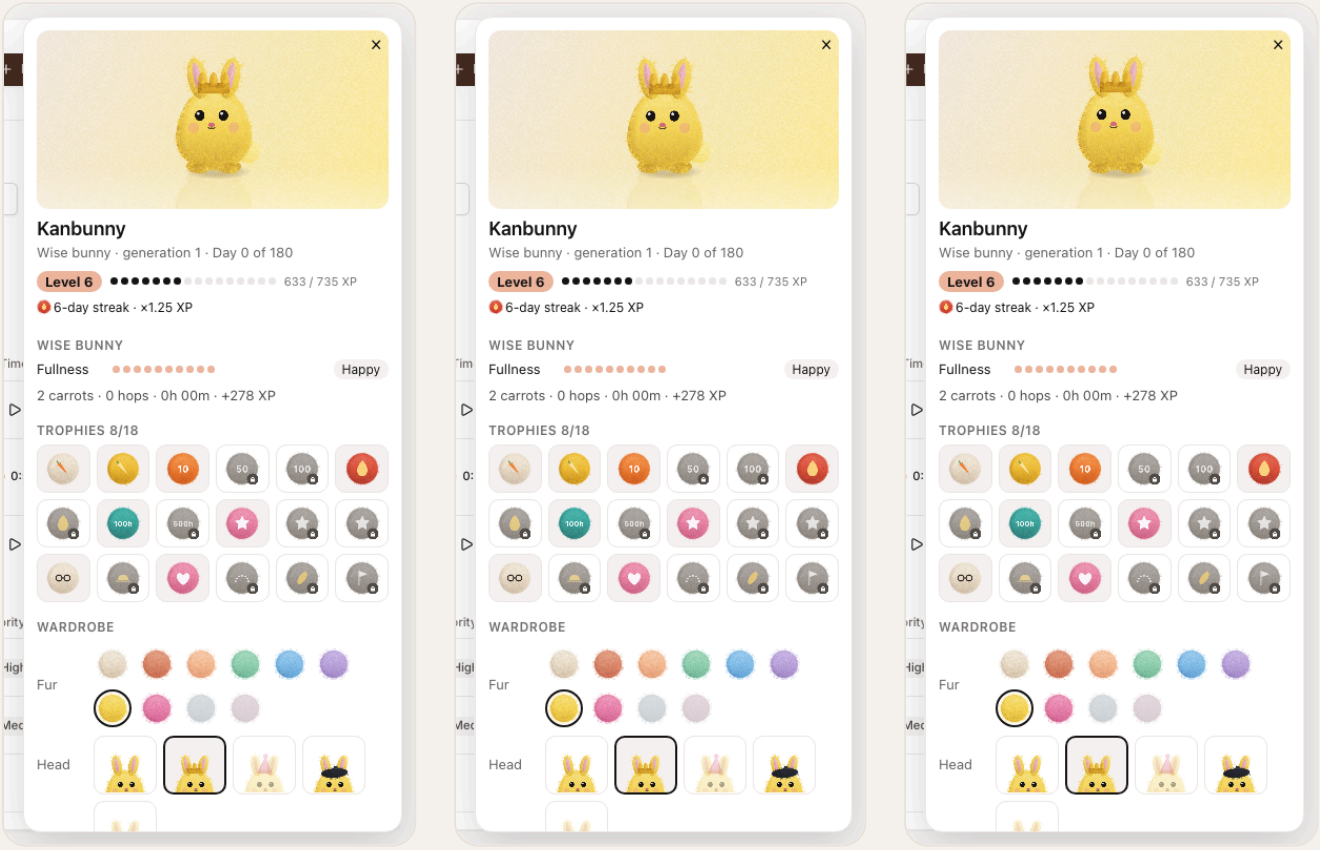

Head, face and neck: crown, headphones, star glasses, bow tie, cape and more, earned with levels and trophies.

ITS OWN PANEL

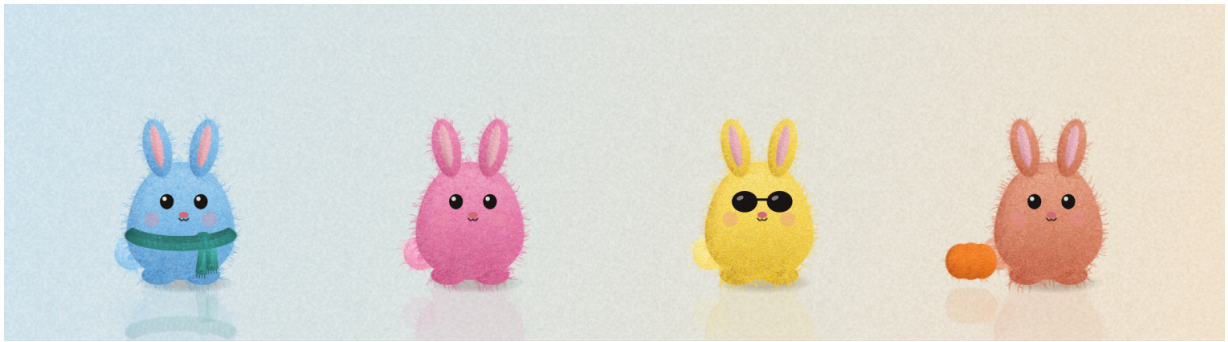

Everything about it, one click away

Click the bunny: a side panel slides in, with no backdrop, so your page stays usable. Level and streak, hunger and mood, the trophy case, the wardrobe, a weekly diary to export as an image, and the family album.

Seasons

Snow in winter, petals in spring, sunglasses in summer, leaves in autumn, a pumpkin for Halloween, eggs at Easter.

GET KANBUNNY

Three steps, inside inkledger

1

Get your licence

Licences are free: request yours from the inkledger project page.

2

Install the module

In inkledger, open Settings → Extras → **Install module…** and choose the Kanbunny file you received.

3

Activate it

Paste your licence and press **Activate**. Reload, and look at the bottom corner of the panel: an egg is waiting.

Good to know

- It runs inside your own inkledger: no account, no tracking, nothing leaves your server.
- The licence is checked offline and is shared by everyone on your inkledger server.
- Turn all modules off any time from Settings → Extras.
